CM/ECF VERSION 2.5 UPGRADE

The CM/ECF System for the Western District of Arkansas has been upgraded to provide the latest enhancements. Listed below are the enhancements for PACER Users and Attorney Users.

PACER USERS

Civil Cases Report: The Civil Cases Report can be sorted by case title. The **Case Title** option has been added to the *Sort by* drop-down lists on the selection criteria screen.

Query: When running a query on a name or date range, the date the case was closed is displayed in addition to the case number, the case title, and the date the case was filed. In criminal and magistrate cases, the defendant names are displayed with their case number hyperlinks.

Access to Documents with the Same Document Numbers: When documents have the same number, and the hyperlink for one of those documents is imbedded in the docket text of a docket entry, if the imbedded document number hyperlink is clicked, the system returns a screen so the user can determine which document should be accessed. The docket text and document numbers, along with descriptions, are included on this selection screen.

Docket Report: The *Demand* value is displayed with commas on the Docket Report.

ATTORNEY USERS

Docketing Multi-Part Events: When docketing multi-part events, such as a multi-part motion, the order in which the events are selected is the order in which they are listed in the docket text. To facilitate this change, the order in which the events are selected is displayed in the status bar at the bottom of the browser window when the mouse pointer is hovered over the selection list. The information in the status window is modified as the user selects additional events, deselects events, and changes the order, when selecting items from the event pick lists.

If there are any questions, or if you experience any difficulties with the CM/ECF System, please contact the **CM/ECF HELPDESK at 1-866-540-5066 or CMECFinfo @arwd.uscourts.gov**.
